# GMS Introduced MOR Switch

GMS Technology (UK) LTD, is one of the fastest growing one stop VOIP solutions provider, specializing in delivering VoIP Billing & routing solutions for start up telecoms, carriers, Calling card operators and ITSP's. The Telecom operators from all over the world benefit from GMS robust VoIP solutions, because they are designed to ensure an optimal combination of billing, routing and reporting features that gives you the capacity to deploy your VoIP business potential.

As the company's policy is to supply one stop VoIP solutions, therefore GMS has introduced an unique VoIP billing and routing software called MOR switch from Kolmisoft, which is an advanced application runs under Linux OS that enables telecom operators to provide flexible Voice services and manage effective service offerings. This is an ideal system for VoIP wholesale and calling card operators.

The Kolmisoft Billing and routing software (known as MOR Switch) integrates the core AAA functions: Authentications, Authorization and Accounting with vital functions that facilitate the effective management of all billing-related processes such as:-

- **Customers**
- **Services**
- **Finance**
- **Services Distributions**
- **Reporting**
- **Traffic Patterns**
- **User rights**

From Business point of view, Kolmisoft software makes possible the deployment of high quality and flexible services within any VoIP business model. On the technical side the system maintains seamless performance at high and rapidly increasing traffic volumes.

As an authorized reseller for kolmisoft, GMS has combined all modules such as calling cards, auto dialler, resellers, SMS modules, Mobile number portability, Recordings and Payment gateways modules installed in a dedicated server with Raid 1 Hard drives system. So the Telecom operators can grow their Voice business with stability and scalability. The introductory price for the system is offered at \$499 per month for details

please send email to: [sales@gmsvoip.com](mailto:sales@gmsvoip.com) this includes initial training and live 24/7 support.
